- Touristic Development Facilities
- Operations Simulation
- Ports Safety

Ports Experience

Oil, Chemical, Petrochemical & Gas Ports

In the **Incostas Nouel Group**, apply our approach in a number of ways, including the optimizing of the port configuration, minimizing downtime, reducing sedimentation, designing structures, providing security, etc.

Our projects range from existing ports, with significant space limitations, to virgin lands that require large-scale planning.

Experience in...

Engineering, procurement and construction of the water replacement system of the fire system. Miramar Services Pier.
EMBYSA
Nicaragua

Project Management Consulting (PMC) service for the T&I Dolphin Platform.
FRONTERA ENERGY
Preparation, execution and transportation from Texas USA to its installation in Lot Z-1 in Peru.

Engineering and construction service for the stabilization of the submarine pipeline of the Marine Facilities of the Miramar Distribution Plant.
EMBYSA
Nicaragua

Replacement Turning and Mooring Dolphin and Connecting Walkway at PDVSA Puerto Miranda Jetty 2
CWAVES MARINE & ENGINEERING CONSULTANTS
Zulia State, Venezuela
Conceptual engineering

Experience in...

Technical assistance for the minor maintenance of the lateral fenders and in the mooring shield of the Petroanzoategui service pier.
CONSORCIO COVEMPRO
Anzoategui State, Venezuela
Maintenance

Technical supervision of the Submarine Pipelines Laying Miramar's fuel distribution plant.
EMBYSA
Miramar. Nicaragua

Special studies in the piers area of the El Guamache fuels distribution plant, Nueva Esparta State.
PDVSA PETRÓLEOS, S.A.
Venezuela

Technical Assistance Services for the Maintenance of Navigation Operations.
Caripito Boarding Terminal
PDVSA PETRÓLEOS S.A.
San Juan River and Maturin Bar

Experience in...

LPG & Petrochemical Marine Terminal at Terminal Jose

Port Experience

Bulk carriers, Shipyards & Specialized Cargo Terminal

The success of the operation of a terminal revolves around the fast and efficient handling of the ships' cargo.

In the **Incostas Nouel Group**, we develop infrastructures for shipyards, general cargo and containers, which consider specialized facilities for the handling of all different types of containers, regardless of the cargo type they contain and that in turn, allows the interconnection between the different transportation modes.

Port Experience

CBM Conventional Buoy Mooring, CALM Catenary Anchor Leg Mooring & Subsea Pipeline

In the **Incostas Nouel Group**, the developing of systems whose main function is that the vessel receives the crude with great speed and efficiency.

- Studies for the location, design and calculation of single point mooring systems
- *Mono buoy*, CALM (Catenary Anchor Leg Mooring) and multiple mooring systems
- *Multi buoys*, CBM (Conventional Buoy Moorings). Underwater Lines Routing, Protection of the Marine Bottom Rock
- *PLEM* Mount, Anchor Mounting

Design, Inspection and *Submarine Pipeline* Installation.

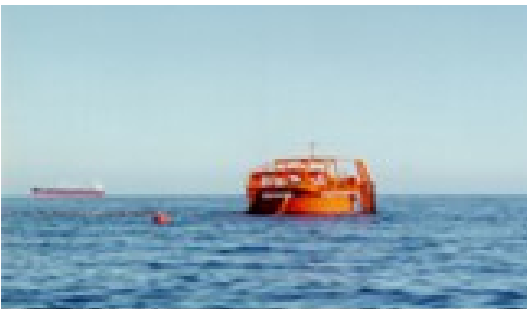

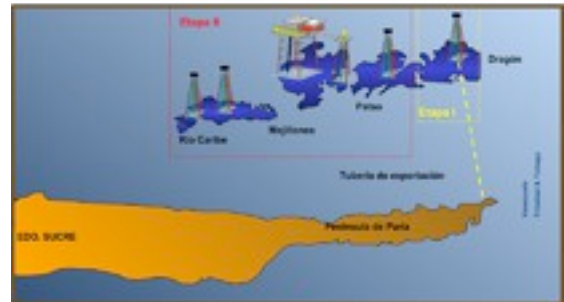

We count with qualified hydrographs, geophysicists, and technical support staff as well as the latest state-of-the-art technology equipment, capable of carrying out studies and measurements of the highest quality and reliability. Routes Feasibility Studies, Hydrographic Surveys, Marine Bottom Samples, Design of Submarine Pipelines, Valves, Submarine Hoses and Connections, Mooring Buoys, Anchorage and Beacon Systems, Pipeline Installation.

Port Experience

Multipurpose Ports and Terminals, General Cargo and Containers

Multipurpose terminals are ports not specialized in cargo handling because they are designed for various types of cargo. The success of a terminal operation revolves around the fast and efficient handling of its cargo.

In the **Incostas Nouel Group**, we develop infrastructures for multipurpose terminals, *general cargo and containers*, which include specialized facilities for the handling of all different types, regardless of the type of cargo they contain and which in turn purchased the interconnection between the different modes of transport.

Port Experience

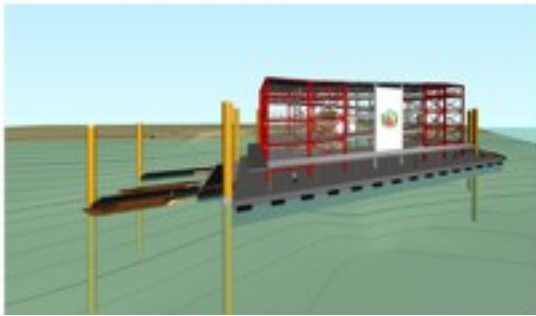

Terminals for Ferries, Ro-Ro y Cruises, Sports Marinas and other Tourist development

In the **Incostas Nouel Group**, we provide integral solutions that range from the evaluation of the feasibility, planning, infrastructure construction and quality of services that ensure the efficient operation and handling of **RO-RO** loads as well the attention to passengers and crew members of **tourist cruises**.

The projects of sports ports and marinas require specialized consulting services in order to obtain the maximum potential and economic yield. Our success in this sector lies in our extensive experience in the developing of infrastructures for both public and private use.

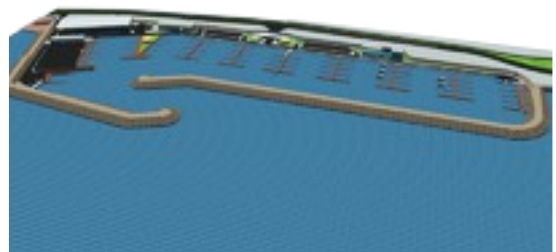

We design and develop solutions of the highest quality, from small infrastructure such as jetties, access ramps, etc., to large marine facilities with all necessary services. We also carry out studies to optimize the existing installations.
